

■ Bleed Area

Anything here will be trimmed off, but remember to extend any design or images to the OUTER edge of this 2mm bleed area to avoid white lines appearing during the print finishing stages.

■ Trim

We cut as close as possible to the solid black line, any images or text placed in the 2mm area may be trimmed off incorrectly.

■ Safe Area

Keep the important parts of your design inside the white area.

Remember to use highest possible resolution for the best results.
